

8102

a collective statement out of the future

Note:

In this statement out of the future, a multiplicity of voices and messages are curated into a single one. As J. Suriwuecki argues "We should stop hunting (the expert) and ask the crowds instead. Chances are it knows." Language contains in its core transferability. It is the accumulation of its connotations that can lead us towards one of the possible understandings of a sentence. It is the accumulation of the different voices that can give us a look through a window to the future, in a mirror of the now:

8102.

K&A

**Dear people, from
the what you call
past... I am doing
this excercise on
understanding
your concept of
time.**

What is normality?

What is distortion?

What is humanity?

**What is robot,
what is being a
robot,**

am I a robot?

Am I human?

**Am I a combina-
tion of both?**

Humans are humans

voids are voids

greed is greed,

**8102 to
absorb the
excess.**

**Nature has been left
to evolve by itself.
We have been building
a world on top
of that in a way that
both of our worlds
can function optimally
and not disturb
each other.**

**The planet has
been healing over
the past 6000
years**

**I am a timetraveller
and a few days ago
I went back to the
year 2020
and
now i know...**

**... and you that
are under water,
do you know if
breathing is still a
necessity?**

**The parameters of
normality are
altered.**

**These parameters
are so fragile to
become others,
to become
unaltered,
unstable.**

**We've replaced
POLITICIANS with
ALGORHYTHMS,
most of REALITY
with SIMULATION
& PORN with
CASTRATION,**

**so nothing really
changed that much.**

**We no longer use
English**

**because we don't
have past, present
or future tense.**

**The underground
network of fungi
makes up more
than 80% of our
communication
systems
today...**

**...news from dis-
tant
districts.**

**We can listen to
the plants, baby**

**The pace of life
should be a bit less
hectic than in 2018.**

**Now in 8102,
we have screens
on our skins,
engraved like
tattoos**

- cellmates

from the bacteria

that created us.

**This is me. I might
be turning into my
robotic self. It feels
weird to talk like
this, in sequences,
somehow, rhythmi-
cal sequences.**

**This is a manual of
8102:**

**All living entities
have tranfered
their concious-
ness into the
network...**

**The United States
seem to have
disappeared...
but we hesitate to
go look for them
for ALL the obvious
reasons.**

**Inside the
camp we
are safe.**

From 8102 to the now, quoted out of their future-voicemessages:

Alkis Barbas, Cecile Lassonde, Manolis Ladas, Christianne van Leest, Jibbe Willems, Lenn Cox, Loan Lobo de Miranda, Louise Knobil, Olívia Campelo, Simona Piras, Sophie Kern

8102 is a project by K&A (Karla Isidorou & Alexandra Bellon). This message from the future is curated by K&A and Dennis Gaens in collaboration with ArtEZ Studium Generale & Joke Alkema
